**Letter of Recommendation for the Katowice University of Technology Press**

To Whom It May Concern,

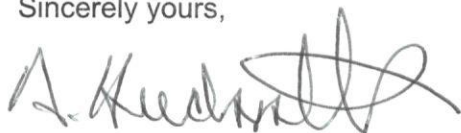

It is with great pleasure that we provide this letter of recommendation for the University of Technology in Katowice, and confirm that they have been a reliable and professional partner who we collaborate with in project proposals. Katowice University of Technology Press, as a part of the publication division of the University of Technology in Katowice, provides publishing opportunities for reviewed non-serial publications, including monographs, teaching resources, scripts, and conference materials, as well as serial publications.

Based on the experience of our partnership we can confirm that the University of Technology in Katowice fulfils all ethical and scientific standards in its work. To the best of our knowledge, these standards have been developed based on the guidelines of the Committee on Publication Ethics, contained in the COPE Code of Conduct, in order to ensure the proper, timely, and honest preparation of scientific publications, while adhering to all ethical practices. We would like to add, that the decision to publish any scientific monograph is made independently of any fees paid.

In our opinion, the Katowice University of Technology Press plays an important role as a forum for the exchange of knowledge and scientific achievements, including popularization and broad dissemination, which are crucial in the scientific world. The topics covered in the publishing series are relevant for the development of all academic disciplines, and the research results and scientifically developed topics serve both the authors and the academic community. This has been reflected in the use of this knowledge by others, including our scholars.

As a result of the above-mentioned topics, we believe that Katowice University of Technology Press should be recognized by the Ministry of Education and Science of the Republic of Poland and be included on the lists of domestic publishers which fulfil all academic integrity norms for published works.

Sincerely yours,

Don Hudspeth  
President & Dean
